

Interpex Software

IX1D version 3 \$999* - with TEM option: \$3,499*

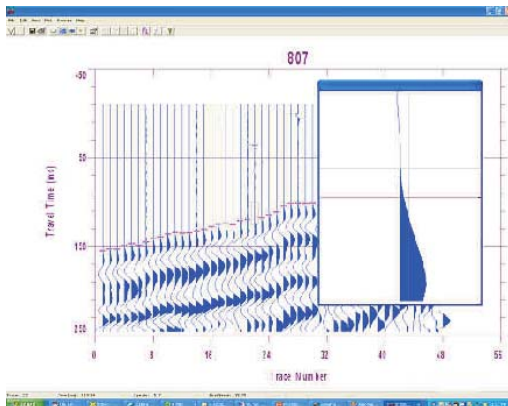

1D Sounding Interpretation with profile support

- 1-D Forward and Inverse Modeling for DC Resistivity, IP, MT, Frequency EM and EM Conductivity soundings
- Virtually no limit to size or number of soundings or size of models.
- Spreadsheets for creating or editing data.
- Graphical or spreadsheet model editing.
- Forward and Inverse for Layered models, Smooth models, Equivalence Analysis.
- Map display of sounding locations.
- Profile data import from XYZ files.
- Graphical profile creation from soundings.
- Data display as Zaborovsky, profile or pseudosection plots.
- Model display as Zaborovsky plots, depth section or elevation section.
- Batch or pseudo-batch calculations.
- Clipboard model copy/paste to single sounding, to

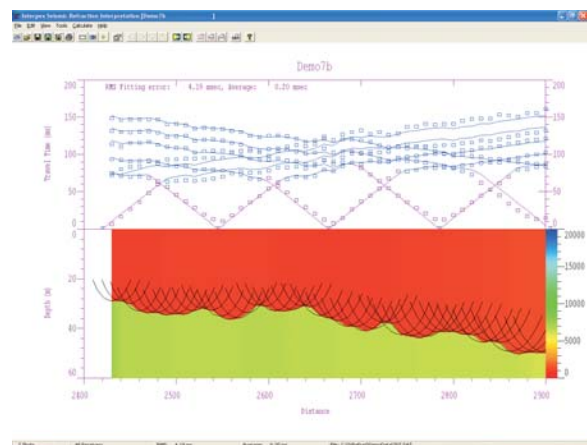

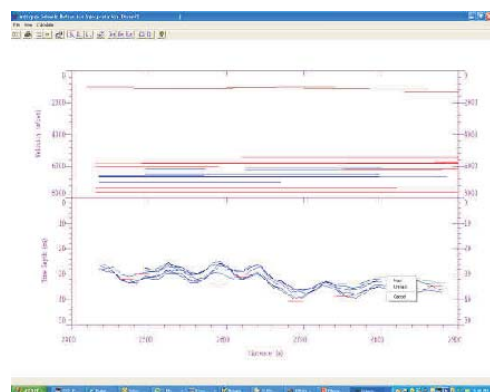

Finally Released!! IXRefrax: \$999*

Seismic Refraction Processing and Interpretation using the Generalized Reciprocal Method

- Virtually unlimited size and number of shot records.
- Direct Import of virtually any Seismic Trace Data Format: SEG-1, SEG-2, SEG-Y.
- Import of first break picks from Flat ASCII and GREMIX-style GRM files.
- Fully integrated Trace picking/processing and travel-time curve analysis.
- 2-D Forward and Inverse Modeling using a simple and very fast method based on the same assumptions as made with GRM.
- Automatic assignment of layers to Arrivals.
- Convenient Visual Inspection and Manual Editing of Arrival Assignments.
- Automatic Velocity analysis with Full Manual Intervention and Editing.
